

# Comprehensive Suite of Solutions for All Healthcare Administration Needs

No matter what your administration technology needs are, VBA has a solution for you. Highly configurable and scalable across all lines of business, VBA provides one common architecture and end-to-end functionality for benefit administration, user engagement, business insight and more—all in real-time. Empower your business with configuration, not customization.

## Experience the VBA difference:

- Administer all lines of business on a single platform
- Adjudicate claims and pay doctors immediately
- Deliver self-service web portals for all constituents
- Control and automate the enrollment experience
- Discover hidden, actionable insights in your data
- Hyper-boost administration through superior predictive technology
- Support the customer experience through an omni-channel solution
- Delivers honest pricing, removing the markups found in prescriptions, so you pay exactly what the prescription costs

Benefit Administration	User Engagement/ Customer Support	Business Insight
VBA Software	VBA Gateway	VBA Analytics
