

## MultiPlan and HST Have Come Together to Empower Value-Driven Health Plans

Protecting your clients from high costs while helping to shield their members against balance billing just became a lot easier. MultiPlan acquired HST, and together we're offering an integrated solution that combines our practitioner and ancillary network with HST's reference-based hospital pricing to empower value-driven health plans.

Generating average savings over 73%, with a 98% acceptance rate, HST outperforms the competition. And HST's program extends beyond the pricing function, engaging both plan member and provider to help make the most of the benefit plan:

- Offers a mobile app that allows the member to select network doctors and HST accepting hospitals based on cost and quality, where available
- Communicates with the provider at key points such as prior authorization to make sure they understand the plan and potential reimbursement, or agree to an acceptable settlement
- Includes a patient advocacy service to help members with unexpected bills should they occur
- Has an optional legal support service called Sentry, similar to what traditional reference-based pricing services typically offer

### **Advantages of Our Integrated Network and RBP Solution**

#### **One-stop sales process**

- Combined and co-branded savings analytics
- Integrated implementation process for new groups
- Bundled PEPM pricing for all claims
- Preferred stop loss rates

#### **Streamlined operations**

- One contract, covering both services
- One invoice, combining billing for both services\*
- One single claim submission for pricing all of your claims\*

#### **Elevated group and member experience**

- Combined provider search in one mobile app\*
- Member engagement materials
- Combined client performance reporting

Give your clients a seamless value-driven health plan solution that reduces the total cost of care while maintaining the highest member satisfaction.
