

Alternative Funding Programs for Specialty Medications

As specialty medication costs rise, many clients seek cost-effective solutions for managing their prescription drug benefits. One approach that has gained popularity in recent years is using alternate funding programs. By leveraging Patient Assistance Programs (PAPs), our clients can significantly reduce their costs while maintaining medication access.

We offer two alternate funding options to meet each client's unique needs.

Our Specialty Assist Program (SAP) is a carve-out solution that provides a cost-effective alternative to traditional specialty drug coverage. Members who qualify for need-based assistance receive their medications at no or low cost.

Using this option, our clients:

- **Keep their pharmacy benefits managed under one roof.** The program works seamlessly with our clients' existing pharmacy benefits, providing an integrated solution for their specialty drug coverage needs.
- **Achieve significant savings.** Clients using our Specialty Assist program can experience a 50-70% reduction (or more) in Specialty spend.
- **Pay reduced fees.** We charge on a per-employee per-month (PEPM) basis, and our prices are 40-76% less than competitive offerings.

We take an agnostic approach in deferring to consultant and plan preferences.

We can also accommodate clients that prefer to have their alternate funding program administered by a third-party vendor.

- We understand that our partners may have existing relationships in this space, including those that incorporate reimportation to drive additional savings.
- We currently interface with several alternate funding vendors and we are open to entertaining additional partnerships.
- We provide daily file & eligibility exchanges and dedicated staff to ensure a smooth interface with your preferred vendor.
